

## How Low Can We Go?

### City of Atlanta Water Average Use For October 2008

**NOTE:** The City of Atlanta target and averaged usage figures represented on this graph are based on a combination of the usage from the city-operated Chattahoochee and Hemphill plants (as reported to the State under permit WSID: GA 1210001) and the usage Atlanta draws from the jointly operated Atlanta-Fulton County Water Treatment plant (reported under a separate permit for that facility). Therefore, these figures represent the total averaged daily usage for the Atlanta drinking water system, but do not directly correspond to the City's weekly report to the State of Georgia.
