

Leaky toilets

**can waste up to 200 gallons of water per day
and cost you hundreds of dollars for water you
don't even use!**

You can't always hear a leaky toilet, so you should check for leaks at least once a quarter. Use leak detection tablets or food coloring to check for leaks as follows:

- 1) Remove cover of toilet tank
- 2) Drop leak detection tablets in toilet tank
- 3) Wait 5 minutes
- 4) If color appears in the toilet bowl, you have a leak

Leaks are often cheap and easy to repair.

You can find information on repairing toilet leaks at http://www.epa.gov/watersense/our_water/fix_a_leak.html.
